

~~THIRD THURSDAY~~ THINGS FROM THE FIELD

Wednesday!!

WHAT IS IT?

A new, recurring event for 2025 to meet the newest Sac Valley orchard advisors in a casual setting and get timely updates on things we've been seeing in the field. Bring questions and pictures and comments!

PRUNE TREE KILLERS

Join us to learn about diagnosis and management of Cytospora, Bacterial canker, Phellinus, Phytophthora, Prune Brownline, and gophers. Panelists include farm advisors Jaime Ott, Luke Milliron, Franz Neiderholzer and Becky Wheeler-Dykes.

ROUND TABLE

After the discussion of prune killers, we'll open the floor to discuss issues and concerns from the field for all tree crops. Bring your questions, observations, photos and more for an open forum of growers, PCAs, industry members and farm advisors.
