

THIRD FRIDAY: THINGS FROM THE FIELD

WHAT IS IT?

A recurring event to meet the Sac Valley orchard farm advisors in a casual setting and get timely updates on things we've been seeing in the field. Bring questions and pictures and comments!

SPIDER MITE CONTROL & MANAGEMENT IN CALIFORNIA ALMONDS

Special guest, farm advisor Raymond Mireles, will join us from Fresno County to present on best practices for managing spider mites in California almonds. Moreover, Raymond will delve into current control options and provide updates on ongoing research.

ROUND TABLE

After the mites presentation, we'll open the floor to discuss issues and concerns from the field for all tree crops. Bring your questions, observations, photos and more for an open forum of growers, PCAs, industry members and farm advisors.

Lunch is provided!

AT A GLANCE
